

Aaron Tippin, I Wonder How Far

I parked my car beside the highway
and I didnt lock the door
left a note there with the keys
if she cranks then friend she's yours

then i struck out across texas
gunna walk it line for line
now i'm half way cross new mexico
and your still on my mind

this road keeps going nowhere
just leads me on and on
ask I ask myself with every step
will i ever be alone

I wonder just how far it is over you
is there no place i go
that you dont come too.
cause when I left Tennasee
I thought that we were though
now i wonder how far it is over you.

I was deep in california
when i finally made a freind
it was me and that old hobo
till you showed up again
the he ran out of liquor
and I ran out of time
im standing by the ocean
and your still on my mind

Staring at the water so blue and deep and wide
I'll bet a man could lose a memory over on the other side

I wonder just how far it is over you
is there no place i go
that you dont come too
cause when I left Tennasee
I thought that we were though
now i wonder how far it is over you.
