

# Abrasive Wheels, First Rule (No Rule)

Everywhere we go we get pushed around  
But why whats our crime  
Just in the wrong place and at the wrong time  
Were always out of line  
And all of your restrictions  
Could never change what I believe  
Contradicting discriminating is making my heart bleed  
No rules is the first rule are you too hip to see  
You can follow the leaders but dont dictate to me  
Dividing lines unite you Rules to set you free  
Contented nothings gonna change the world  
However can that be  
Becoming the people you want to destroy  
By shortening your sight  
Judging credibility through your eyes  
Why do you think your so right  
No rules is the first rule are you too hip to see  
You can follow the leaders but dont dictate to me
