

Angra, Here In The Now feat. Vanessa Moreno

Inside your worried mind
Counting every beat of your heart
Trying to fit into this world
You're still young and life's a journey

Nothing really matters 'til you start
Things you do will define who you are
Wise men try to understand
And not to judge their fellow man at all
Just try

Open your heart
Be the change that you want for this world
Look in the mirror
Open your heart
Let the seeds that you sow be the future
Here in the now!

The sun was beating down
Dried up all the tears that you've cried
Lose the mask we've worn for ages
Now you know just where we stand

Open your heart
Be the change that you want for this world
Look in the mirror
Open your heart
Let the seeds that you sow be the future
Here in the now!
We're living here in the now

Open your heart
Be the change that you want for this world
Look in the mirror
Open your heart
Let the seeds that you sow be the future
Here in the now!

Open your heart
Be the change that you want for this world
Look in the mirror
Open your heart
Cuz the seeds that you sow are the future
Here in the now!
