

Anne-Marie, Then

We had it good, you know
I spent like six years
Making sure you came home to love
You had it good, you know

I stood by your side
I spent up so much time
Tryina make you happy
I don't think you ever could be happy

Maybe you should try some therapy
Maybe you should lose a couple homeboys
Give up on the homegrown
Look at me
Cause I need you to understand

Now when you think of late nights
With me there, in your bed,
True, ride or die that's what you had
I loved you, I loved you, I loved you

And when you think of my body on yours
Don't forget, once I would've died for you, baby
I loved you, I loved you, I loved you
But that was then
But that was then

You don't know shit, you know
You act this big man and
You think you are in control
But you don't know shit, you know

I stood by your side
And pulled you away from your fire
Again and again and again
I shoulda known fire would win

Maybe you should try some therapy
Maybe you should lose a couple homeboys
Give up on the homegrown
Look at me
Cause I need you to understand

Now when you think of late nights
With me there, in your bed,
True, ride or die that's what you had
I loved you, I loved you, I loved you

And when you think of my body on yours
Don't forget, once I would've died for you, baby
I loved you, I loved you, I loved you
But that was then
But that was then

[2x]
You gonna miss me
You're really gonna miss me
You gonna miss me
You gonna miss me
You gonna miss me
You're really gonna miss me

Now when you think of late nights
With me there, in your bed,

True, ride or die that's what you had
I loved you, I loved you, I loved you

And when you think of my body on yours
Don't forget, once I would've died for you, baby
I loved you, I loved you, I loved you
But that was then
But that was then
