

Anointed, In the Need of Love

Each day, I'm learnin' not compare myself
There's always gonna be somebody else who's more successful
Who seems to have my wants from me
I wonder if they feel the same about me
Said we can be surrounded by the finest things and still you're so alone
And everybody has their share of their doubts
Moments of up and downs, turnarounds
It's just a part of life
Come on reach out your hand
Let's join and take a stand
And find a way to make the world a better place
We can't give in from the one thing we must face
We're all in the need of love, all in the need of love
We're all in the need of love
There's always [Incomprehensible]
And there will be tears that fall
People who lose and give it up
There's gonna be sunshine after the rain
As feel their sky is always gonna be a [Incomprehensible]
Said nobody knows what the future holds
All we have is now
And if we put our hearts together
I know we can build the love and rise above
That's what our dreams made of

Come on reach out your hand
Let's join and take a stand
And find a way to make the world a better place
We can't give in from the one thing we must face
We're all in the need of love, all in the need of love
We're all in the need of love
We need a love that will stretch beyond the measures
We need enough to make it last forever
We need a love, hearts can treasure upon
We need a love to contain you and never part
If you let, if you let, it will be begin
[Incomprehensible]
And you will see what will set you free
And to have another be your guiding light
We're all in the need of love, we're all in the need of love
Hey, everybody, we're all in the need of love
We're all in the need of love
Hey, everybody, we're all in the need of love
We're all in the need of love
Hey, everybody, we're all in the need of love
We're all in the need of love
Hey, everybody
