

Arcade Fire, The Woodland National Anthem

I guess well have to move
The neighborhood is on to us

Lets join the little babes
Throwin rocks in front of us

Riding on my bicycle
I pass my sister on a bus
Lets take the country road before our parents send for us

Trees keep fallin at my feet
I guess its time ot build a boat
Make a raft of our bodies
Do you think that itll float?
What I said was not a joke,
But you just licked the envelope
Im tired of dating, lets elope
But you just licked the envelope

Three cheers for my parents,
Lonely failed experiments!
Three cheers for my parents,
Lonely failed experiments!

Dont you dare blame my parents
Im the only failed experiment
Dont you dare blame your parents
Youre the only failed experiment
Dont you dare blame your grandparents
Moms the only failed experiment
Dont you dare blame your grandparents
Dads the only failed experiment
Dont blame God
Just blame God
Dont blame God
