

Astralion, Nightmares Never Give Up

In the dark of night
Just before the dawn
When you realize every nightmare is real

Dreams and delights
You thought was your own
Things you thought that no one
Ever would steal

Ecstasy, come ride the beast
Come join the feast
Forevermore
Desperately you seek for love
From high above
But they've closed the doors

I rode in on your dream
To kill you in your sleep
To forever close your eyes
Are you ready for true love
That cuts real deep
Please answer me with one last sigh

Sleep forever sleep
Take the poisoned fruit
And you'll see that all you thought was dark
Is now light

It will make you see, it will make you mute
It's time to enter through the gates of the night

Ecstasy, come ride the beast
Come join the feast
Forevermore

Desperately you seek for love
From high above
But they've closed the doors

I rode in on your dream...

Like a big black cat I will stalk my prey
I'm a big dark cloud on a stormy day
You will toss and turn in your bed my dear
Feeling powerless you can't fight the fear
