

Avian, Interstellar (Lost in the Void)

I am drifting away from home
Heading towards a shining star
From ancient times, it has been known
That it's dangerous to play with fire

How can I reach this beautiful star?
While staying where I belong?
It is so close but yet so far
What will I do, what have I done?

Lost in the void
I'm slipping away
I'm lost in the void
Interstellar... Interstellar

My star is visible already from here
But still it's lightyears away
I try forever to get finally there
Magnificent light leads my way

I know that I will never arrive there
Still I'm attracted by this star
I have left my beloved planet home
Here I am, lost in the void

Lost in the void
I'm slipping away
I'm lost in the void
Interstellar... Interstellar

Intimidating fusion powers
Particle storm from the core
Energetic radiation
Ripping body and soul
