

B.B. King, Caught A Touch Of Your Love

I'm not feeling like I usually do
I think it might have something
To do with you
Every time you're near me
My body gets hot
Don't need a doctor
I know what I've got

Caught a touch of your love
It came on overnight
I must have held you too tight
Last night
Caught a touch of your love

Your affection has affected me
I'm feeling kind of dizzy
And weak in the knees
I've been in love before
But never so bad
You're in my system
And it's driving me mad

The fever from your kisses
Tears me apart
It starts from your lips
And goes straight to my heart
No use pretending
'Cause baby, I'm sure
There's no cure
And I've just gotta have more
