## B.B. King, Take it home

Way down South there's a clear stream running In the night I feel my heart turning I'm feeling some day I'd like to come Back to the place I started from Take it home Country night with the stars above me Way down there with the ones who love me Mother, Sister, Father, Son They mean more than anyone Take it home Fall winds blow and the red leaves falling Don't know there's a voice keeps calling Saying, you have found your song You've been gone so long Take it home Seems my life is a long road winding Gone so far but the ties are binding I'll pack up my bags and fly away To a far better day Take it home Don't know why I was made to wander I've seen the light, lord I've felt the thunder Someday I'll go home again And I know they'll take me in Take it home
