

Bananarama, I Found Love

Had this feeling lately
I just can't get you off my mind
When I see you, you make me
Make me lose all sense of time
When you hold me, baby
You turn my world upside down, yeah
When you touch me, oh baby
My feet don't even touch the ground
I found love, yeah
I've got a lover who gives me more
The kind of love I've never found before
'Cause I need no other when you're around
'Cause the love I've found takes me higher
I was thinking maybe
Am I going much too fast
But something tells me, oh baby
I've got a love that's gonna last
When you're with me, it's easy
You make me feel so good inside
I can love you completely
This time I know I've got it right

I found love, yeah
I've got a lover who gives me more
The kind of love I've never found before
'Cause I need no other when you're around
'Cause the love I've found takes me higher
I, I, I
I found love, yeah
I've got a lover who gives me more
The kind of love I've never found before
'Cause I need no other when you're around
'Cause the love I've found
I've got a lover who gives me more
The kind of love I've never found before
'Cause I need no other when you're around
'Cause the love I've found
I've got a lover who gives me more
The kind of love I've never found before
'Cause I need no other when you're around
'Cause the love I've found takes me higher
