

Bananarama, Only Time Will Tell

Was it written in the stars how I feel it in my heart?
Will I wake up from a dream? Ooh, all my senses are colliding
Feelings running round inside me
Deep in the night, I hope I'm right
Or will our love drift away on the breeze?
Do we have a future or will love become a memory?
Since the day we fell, we knew the story well
Only time will tell, only time will tell
Could this be my destiny when you're lying next to me?
Feel the rhythm of our love, ooh may I never watch our love go
Disappearing into shadow
Deep in the night, I hope I'm right
Or will our love drift away on the breeze?
Do we have a future or will love become a memory?
Since the day we fell, we knew the story well
Only time will tell, only time will tell
Do we have a future or will love become a memory?
Since the day we fell, we knew the story well
Only time will tell, only time will tell
Ooh, all my senses are colliding
Feelings running round inside me
Deep in the night, I hope I'm right
Or will our love drift away on the breeze?
Do we have a future or will love become a memory?
Since the day we fell, we knew the story well
Only time will tell, only time will tell
