

Bananarama, Supernova

It's hard to breathe
This energy
Between you and me
It's so strong
It radiates
Brighter than a galaxy
It's like gravity
You pull me in

You're all I need right now
Won't you stay with me?
'Cause I need you around
You
You're a supernova
You always shine brighter
Ooh, baby
Than anyone

You are incredibly beautiful
When you take me in your arms
All the starlight in the universe
Flash like diamonds in your eyes

You're all I need right now
Won't you stay with me?
'Cause I need you around
You
You're a supernova
You always shine brighter
Ooh, baby
Than anyone

You're all I need as the nights grow colder
You're all I need right now

You're all I need right now
Won't you stay with me?
'Cause I need you around
You
You're a supernova
You always shine brighter
Ooh, baby
Than anyone

You're all I need right now
Won't you stay with me?
'Cause I need you around

You're a supernova
