

Bananarama, Take Me Away

Take me away with you
Where we can do
All the things that we have ever wanted to
Take me away somewhere
Where we can share
This love

I close my eyes, now it's clear
Feels like I've been sleeping for a million years
'Till you came, I couldn't see
Now your kiss is breathing life back into me

Why worry about the world outside
We've got everything we need

Take me away with you
Where we can do
All the things that we have ever wanted to
Take me away somewhere
Where we can share
This love

How can I love you more
Heaven knows that you're the one I've waited for
Now you're here, no more tears
Hold my hand and baby we can disappear

Why worry about the world outside
We've got everything we need

Take me away with you
Where we can do
All the things that we have ever wanted to
Take me away somewhere
Where we can share
This love

Why worry about the world outside
We've got everything we need

Take me away with you
Where we can do
All the things that we have ever wanted to
Take me away somewhere
Where we can share
This love

Take me away with you
Where we can do
All the things that we have ever wanted to
Take me away somewhere
Where we can share
This love
