Bananarama, Take Me Away

Take me away with you
Where we can do
All the things that we have ever wanted to
Take me away somewhere
Where we can share
This love

I close my eyes, now it's clear Feels like I've been sleeping for a million years 'Till you came, I couldn't see Now your kiss is breathing life back into me

Why worry about the world outside We've got eveything we need

Take me away with you
Where we can do
All the things that we have ever wanted to
Take me away somewhere
Where we can share
This love

How can I love you more Heaven knows that you're the one I've waited for Now you're here, no more tears Hold my hand and baby we can disappear

Why worry about the world outside We've got eveything we need

Take me away with you Where we can do All the things that we have ever wanted to Take me away somewhere Where we can share This love

Why worry about the world outside We've got eveything we need

Take me away with you
Where we can do
All the things that we have ever wanted to
Take me away somewhere
Where we can share
This love

Take me away with you
Where we can do
All the things that we have ever wanted to
Take me away somewhere
Where we can share
This love
