Beatsteaks, Vision

i've been watching from behind the scene i worry you've been given bad routine forget the damage they have done to you i make sure i keep an eye on you

sick now - are you meant to be broke down to disillusion street shake now - got to hear me out i come down this is my way out got a vision you can live in got a vision to be given

revolving all around the cash machine it don't work, you know what i mean there ain't no time to count the friends you've got there ain't no time to miss a thing you've lost

sick now - are you meant to be broke down to illusion street shake now - got to hear me out i come down and figure out i keep my big black eye on you
