

Benjamin Clementine, NEMESIS

If I held my breath on you
I would have died a thousand times
And if chewing was to show you how much I cared
I'd probably be wearing a denture by now
If I held my breath on you
I would have died a thousand times
And if chewing was to show you how much I cared
I'd probably be wearing a denture by now

Our promises, broken
Nemesis sour token
You turn around
March on to your new home
Wherever you're going darling
Please don't you ever forget
To treat others the way you want to be treated
Remember your days are full in number

March on!

Now these days
Hennessy drives my veins
I saw Nemesis smile back at me
Now heresy might be a new fate, fate
Whatever you've chosen to believe in darling
Please don't you ever forget
To treat others the way you want to be treated
Remember your days are full in number
Treat others the way you want to be treated
Remember your days are full in number
Can't say anything for you no more
Nemesis in the cage, darling
Next time treat others the way you want to be treated
Otherwise you get your punishment
Lfie will be Nemesis
Nemesis is
Nemesis is
Nemesis is as a matter of karma
Remember karma
Remember karma
Remember karma
Remember
Remember

So long you run!
