

Big Head Todd And The Monsters, Blue Sky

We've waited long for this day to come
For all the midnight lights we've burnt into the morning sun
I can't wait to see your sweet mysteries
The stars, the sun, the universe, the galaxies
Fly home on your silver wings
With a new song for the world to sing
Light this candle, make it right

Yes you can change the world
True love discovers. She stands, and she won't back down
Oh yes you can change the world
There is no other one just
See if you can find blue sky

Gonna chase the dream, gonna set it free
Gonna make it real, gonna make it shine, gonna keep it grooving on
One small stepping stone
Baby we're not alone
Gonna take you further, higher, faster then you're outta sight
You've got my flame in your fire
You've got my twinkle in your eye,
Reaching for the distant light

Yes you can change the world
True love discovers. She stands, and she won't back down
Oh yes you can change the world
There is no other one just
See if you can find blue sky

Don't change too late, hey, yeah yeah
Or Fade away, hey, yeah yeah,
My stars won't wait

Oh yes you can change the world
True love discovers. When she stands and she won't back down.
There is no other one
Believe and you will find blue sky
