

Big Head Todd And The Monsters, Technology S

Keepin' our wheels turning around
Instead of believing in one thing
We're busy dreaming up dumb things
For taking up time in the world
These are the years, this is the sound
Of living in times of trouble
Of turning the world into rubble
This isn't the easy way out

I am naked and my garment is green now
I am naked and my garment is green now
I am naked and my garment is green, what am I
Alone in the world
Alone in the world
Alone in the world

It may be too late to turn it around
The children will pay for the struggle
By life in a plastic bubble
And sex on a DVD
They'll never see a hippie around
To sell them a song for a lover
There's nothing left to discover
When you refuse to see

I am naked and my garment is green now
I am naked and my garment is green now
I am naked and my garment is green, what am I
Alone in the world
Alone in the world
Alone in the world

Where will I be when your lights go out?
There's only one thing for certain
My hand won't be closing the curtain
Take in and feel what you see
There's nothing left to keep the wind out
No stopping the rain from falling
Or keeping the sun from revolving
Or keeping the truth from the free

I am naked and my garment is green now
I am naked and my garment is green now
I am naked and my garment is green, what am I
Alone in the world
Alone in the world
Alone in the world
