

Black Rain, Dying Breed

i think a witness the decline of a civilization
we are mourning a lost generation
what the hell happened to you folks?
why don't you make any sound?
you looked like a joke
always bragging around

we're still standing
don't wanna go
like a dying breed

dying breed
dying breed we're the last of our kind
dying breed dying
dying breed
like a dying breed

the fall of our legion
the fall of a new generation
the memory of a flame that didn't last
not even a shadow of the past

we passed the point of no return
killing one another
all burnt down to ashes
all dead n' gone

one bullet from my old enemy
one bullet from my girl
one last shot from you my old friend
and i fall
dying
