

# Black Sabbath, Supernaut

I want to reach out and touch the sky  
I want to touch the sun  
But I don't need to fly  
I'm gonna climb up every mountain of the moon  
And find a distant man a-waving his spoon

I've crossed the ocean, turned every bend  
I found the crossing near a golden rainbow's end  
I've been through magic and through life's reality  
I've lived a thousand years and it never bothered me

Got no religion, don't need no friends  
Got all I want and I don't need to pretend  
Don't try to reach me, 'cause I'd tear up your mind  
I've seen the future and I've left it behind
