

Blackbriar, Fractured Fairytale

Step into my fractured fairytale
It is magical but dark as well
But stars cannot shine without darkness
There lies beauty within darkness

Dream away with me
To a world of dark creation
Leave reality
To my imagination

Step into my gothic novel
It is romantic but also awful
But passion grows even when you're heartless
Things get so deep here in the darkness

Dream away with me
To a world of dark creation
Leave reality
To my imagination

I welcome you into the pages of my mind
Will you meet me in the next chapter
Be a part of the story line
Be my beautiful disaster
My tragedy ever after
My happily happily tragedy
My happily ever after

Dream away with me
To a world of dark creation
Leave reality
To my imagination

Fly away with me
Away through the black black sky
Spread your webby wings
We belong to the night

Dream away with me
To a world of dark creation
And leave reality
To my imagination
