Canibus, Levitibus

"You want power...but you're not big enough so you steal it piece by piece.. take it in spoils...and step by step you'll weaken and the power is gone"

Levitibus..

I wanted some power of the chakra with mofulean darkness describin what I see in the process stone statues surrounded by neolithic objects ceoglyphs on the pompa a dose of the palamine, niggaz will feel like a dream the dreamstate is the playground for the supreme critics attempt to follow a trend today they call me a Charlotten but tomorrow I will be a God of men to create a universe all I need is 1000, trillion, trillion degrees so with 22, betatrons in the cloud chamber keep the noise down so I dont arouse my neighbors got a message from the falcon in the snow man another note in a Coca Cola can showed the whole planet in coded program enrypted by a pro-scan modem with a lowband hold up, let me load it in

"Darling I am a scientist..(you're a person, you ought to think that) None of this is able to work without an army.. (there's no need) vaporizin my spit and turnin liquid to gas"

I was created by intelligent design you are merely a descendant of the immodified you diss me out of pride but when youre finished talkin bout one of your bitches youre simply out of rhymes even my worst album was sublime if I dont slow down, i'll distort the timeline back through the time, turned into a 100 bars again a master like the honorable Earl of Cannaben the grand architect used to be a partisan to LeMarketson's theory but I lost the bet no regrets, you live and you learn I'm through givin advice, I just give concern sterilize my hands to prevent catchin the germs and try to rebuild all the bridges I've burned I prefer modesty over con-troversy but what am I to do when these jerks keep botherin me jealius cuz they cant rhyme like me and they never had a scientific mind like me

"Darling I am a scientist..(you are a person, you ought to think that) None of this is able to work without an army.. (there's no need) vaporizin my spit and turnin liquid to gas"

I'm above average with verbal semantics
the aurora borialis in the form of a rap ballad
you look at me like "poor bastard
why cant you manipulate billboards with all your metaphor magic?"
no matter how hard I practiced
every microphone I sorta grabbed it
obviously thats the wrong tactic
I went through a long period of mourning and sadness when I wrote that Stan shit
but if you wanna see some hardcore Canibus just say so
and i'll come out the eggroll with seven death scrolls
if you can find a better flow?
then I can find a dinosaur on the Galapagos archipelago
hey you shouldnt fall for the naivette

lyrically I'm the illest when my beats is ok food for thought, nutrition for the whole brain keep your neurotransmitters warm on a cold day I'm ahead of my time, or so they say I guess thats why I already feel old and grey okay, thats enough knowledge for today, I'm killin em you best not forget it cuz this is Levitibus

" Darling I am a scientist.. (you are a person, you ought to think that) None of this is able to work without an army.. (there's no need) vaporizin my spit and turnin liquid to gas"
