

# Cattle Decapitation, A Photic Doom

This accretion where gas and dust consolidate  
under gravity's control began a wasteland alone  
No sign of life, intelligence has no role  
Compounds of four elements, the beginning molecules of a soul

Geyser of light peers through the darkness  
No ocean, no atmosphere  
Hadean eon rise  
Abandon hope all ye who enter here

Here where all faith goes to die  
Where we are damned by the light

Complex sequence of elements  
Bond together life's essence  
Sugars, enzymes, proteins, deoxyribonucleic acid  
From the kingdom to the order bricks and mortar of a doomed future

A spirit born in the darkness  
a new species to arise  
exothermic and heartless  
with a penchant for earthly demise  
Thriving in the light-less  
No need for hope, a future with no  
illumination and sightless  
and grown without incandescence

Skin starts to burn in the light  
Vampiric nightmare  
The cracking of the sun through the night  
irradiated, alight  
The uphill battle of life

Destroying dark  
Oppressive light, brilliance alive  
Avoid the spark that ends this night, damning sun rise

Geyser of light peers through the darkness  
No ocean, no atmosphere  
Hadean eon rise  
Abandon hope all ye who enter here...

Father Lucifer! Your light still casts a shadow  
In that emptiness we hide behind its veil  
Smashed across the rocks and bleeding in the shallows  
In our quest for light we've aimed our paths to fail

Skin starts to burn in the light  
Vampiric nightmare  
The cracking of the sun through the night  
Goddamn the light
