## Cattle Decapitation, The Ripe Beneath The Rind

Flesh shall flay

Peeled back -- exposing the nutrients of contents of mammal

Nutritious, delicious fruit

The stratified-squamous: keratinized

Epithelia dissected

Pseudo-stratified columnar, uni-cellular goblets (cells) secreting mucus

Gored out

The flesh is ripened - ready to gorge

Visceral contents empty on the floor

Like a fine wine the organs disgorge

Victim lies begging but I'm wanting more

The pain is insane, a new anus is torn

Gaping slice

Opened wide, peeling rind -- bleeding, spurting everywhere...

(now revealing the salty goodness beneath and flash frying it)

Lancing meat

Tender outside -- juicy inside - disgusts me...

Chopping, dicing, scrutinizing, dissecting and separating

A corpse is still a corpse, of course we dine with no remorse

We've sharpened all the knives to know the ripe that's beneath the rind

A blood lust curiosity, what makes these humans tick?

I've known it all my life...

**BLOOD** 

Flesh shall flay

Peeled back -- now exposing the nutrients of contents of mammal

Nutritious, delicious fruit

The stratified-squamous: keratinized

Epithelia dissected

Pseudo-stratified columnar, uni-cellular goblets (cells) secreting mucus

Gored out

And like a wild boar your head is hunted

And like a cantelope your head is opened

And like a pork belly your skin seared sterile

And underneath it lie the lies, the murder, the man, the meat
