

# Charli XCX, Miss U

i love you  
it's obvious, but people can change  
we got bruised  
we left things undecided  
and now we're two people  
we're standing in the city rain  
bur we're brand now  
we turn our backs and walk away

even though we're through  
I'm always here for you  
I know you feel it too  
I am telling you the truth

some nights, I go back there  
right back where we used to love  
think I messed up somewhere  
don't know what I keep running from  
don't know what I keep running from  
don't know why I keep running  
don't know why I keep running

so far  
I am on the other side of the globe  
whit new friends  
with someone else asleep in the sheets  
but I got you  
locked up in a part of my brain  
Forever  
I can't forget my memories

even though we're through  
I'm always here for you  
I know you feel it too  
I am telling you the truth

some nights, I go back there  
right back where we used to love  
think I messed up somewhere  
don't know what I keep running from  
don't know what I keep running from  
don't know why I keep running  
don't know why I keep running

sometimes I miss you when I'm all alone  
and even though we both moved on  
sometimes I play your favorite song  
I play it on and on  
and I miss you when I am all alone  
and even though we both moved on  
sometimes I play your favorite song  
I play it on and on

don't know what I keep running from  
don't know what I keep running from  
don't know why I keep running  
don't know why I keep running  
don't know what I keep running from  
don't know what I keep running from  
don't know why I keep running  
don't know why I keep running
