

Coma, Always Summer

One shoulder suffocating
Wind is blowing, winter's coming
Close those doors that get inside

Who said climate's moderate here?
The frost is really of sager
And it lasts over half a year
Oh no

Painless is a player for the sunrise
It makes me really depressed
I'm crying out for all

You stay moving back your box babe
Let's get out of this place
Direction is the happiness
Oh yea

Standing there shouldn't be a shelf in the pocket
Honey and fruit and play cute all for supper
Your freckled nose is a cruel heart betrayal
As I know your kisses with this some of these days
I'll never forget the suspension in the summer
I'll never forget the slow motion of time
It will make winter swing within my memory
It will make gloomy December is well coming down
(Always summer in?
Always summer in?
Always summer in you)
