

CURLY HEADS, Reconcile

I gotta' step outside now, step outside and beg
You've never seen my life for real
Would anyone who judges come and show his face
I gotta' step outside now, step outside and beg

Did you get a plan for me?
'Cause in this concrete jungle every way you turn you sink
Holding you tight moaning

My favourite way to fall
None of my body parts are just my own
I think we might be all alone

I gotta' step outside now, step outside and beg
You've never seen my life for real
Would anyone who judges come and show his face
I gotta' step outside now, step outside and beg

It's so easy to lose control
Part of myself is ready to go
Streets have never been so cold

My favourite way to fall
Watching you naked closing the bathroom door
We will love again, we will love again

I gotta' step outside now, step outside and beg
You've never seen my life for real
Would anyone who judges come and show his face
I gotta' step outside now, step outside and beg
