## Dark Moor, Gabriel

They are coming from the deep space, filling me with pleasance, showing me their purity and grace, I miss their just presence.

I've seen them in the light, they were bright when they exposed their lessons They brought hope for long, and made me know their song:

Light is OVer mE. Light is OVer mE. And although I'm a child, they have me beguiled, and I trust on their fair true guide: Light is OVer mE.

I know they look after me, goodness is their essence, so they seems to me to plenty of luminescence.
