

# Dasco, What I Need (Right Here, Right Now) feat

There's no need to think about it  
We don't even need to talk about it  
You don't need to worry about it  
Oh no, cause we got each other  
There ain't no words to describe it  
Every day's another possibility  
There's no need to hide it  
No!  
Cause we, we got each other

Keep breathing, cause we're here right now  
Keep breathing, keep breathing

I know you want  
You want everything  
What you need's right here, right now  
I know you want  
You want everything  
What you need's right here, right now  
What I need's right here, right now  
What I need's right here, right now

Sometimes we need to get away  
Sometimes we need a little peace and harmony  
There's no need to be afraid,  
No!  
Cause the sun will always shine on you

I wanna be every day  
Watching the sun see fading to blue  
Even when we're far away  
You know we, we got each other

Keep breathing, cause we're here right now  
Keep breathing, keep breathing

I know you want  
You want everything  
What you need's right here, right now  
I know you want  
You want everything  
What you need's right here, right now  
What I need's right here, right now  
What I need's right here, right now

Keep breathing, cause we're here right now  
Keep breathing, keep breathing  
Keep breathing, cause we're here right now  
Keep breathing, keep breathing

I know you want  
You want everything  
What you need's right here, right now  
I know you want  
You want everything  
What you need's right here, right now  
What I need's right here, right now  
What I need's right here, right now
