## Deep Blue Something, Focus

did they punish you did they say they would live without you did it tear you up inside

did they free the ones you love did they rise above did you feel a certain something inside

well I'm with ya now and I'm glad that you are here now and I wish that I could tell them what it's like well I'm with ya now and I'm glad that you are here now and after all these years you know you were right

and I can't focus- so well help me through it this time I am in hell did we learn anything when we were in school

do you remember when nothing was nothing do you remember those days do you remember what it's like to like the outside do you remember those days well I can't
