

# Default, Made To Lie

It's late again  
Across the bar her night just began  
Her search will end  
She spots her tonight friend, but then

She's been made to lie  
She's out of the airwaves and into the spotlight  
She can't make it right  
There's got to be some way to bring back her first sight

She woke up alone  
While he slept she took off for home  
Left a note by the phone  
No number or name to be shown, but then

She's been made to lie  
She's out of the airwaves and into the spotlight  
She can't make it right  
There's got to be some way to bring back her first sight

Day to night  
Never ending fight  
Trapped forever alone

She's been made to lie  
She's out of the airwaves and into the spotlight  
She can't make it right  
There's got to be some way to bring back her first sight
