Do, Follow Me

Light comes in and watch you wake needing you so much, my heart could break to touch your skin, to feel your hair I'll follow you anywhere

light goes out, I watch you sleep then imagine the love so deep I close my eyes, I breathe the air I'll follow you anywhere

let the waves watch over you watch over me follow me I'll follow you 'till your dreams to secret places is my hand just taken I'll show you what to do I'll follow you

nobody knows who made the stars maybe the whole world is ours from better here and neither there I'll follow you anywhere

let the waves watch over you watch over me follow me I'll follow you 'till your dreams to secret places is my hand just taken I'll show you what to do I'll follow you

hmm
ooh oow
hmmmm
woow follow me
I'll follow you
'till your dreams to secret places
is my hand just taken
I'll show you what to do

yeahyeah

follow me
I'll follow you
'till your dreams to secret places
is my hand just taken
I'll show you what to do

I'll follow you
