

# Donavon Frankenreiter, Our Love

Hang on, so good to see you around  
Never thought I'd see you since you cant be found  
Lets get together, let's drive down to the point  
Lets get together and roll that joint

Please don't forget what I said  
Please don't forget what I said

Can't wait to show you  
My love, your love, my love, our love, yeah

Roll down your window, the worlds out there  
And the glowing sky, I can't help but stare  
Starring out, as far as I could see  
There was a star starring back at me

I wont forget what you said  
I wont forget what you said

Why can't you show me  
Your love, my love, your love, our love, yeah

Baby sometimes we want  
Sometimes we need  
You make me want to stay  
Then you say you got to leave  
Who knows what you'll find  
But in the mean time

I'm just here to show you  
My love, your love, my love, our love, yeah

Hang on where you going to now  
If it gets lonely let me show you how  
Lets get together, one more time before you go  
Lets get together and then you'll know

That I meant what I said  
Please don't forget what I said

Can't wait to show you  
My love, your love, my love, our love, yeah  
I want to show you  
My love, your love, my love, our love, yeah
