

Dream Evil, By My Side

With venom of steel, the enemy is closing in
With dark intentions and souls of black
Blood in the wind, a battle that can't be won
Thunder of steel, lightning attack!

There is no way out of here, hordes of warriors everywhere
Smell of death is drawing near,
Come and fight me if you dare!

Fight by my side, I will never let you down
Fight for your life, till the the end we're standing strong

Hell is unleashed, dead bodies on the ground
Few against many, that is what counts
Legions of doom, crush what is left of us
We need more men, we're going down!

There is no way out of here, hordes of warriors everywhere
Smell of death is drawing near,
Come and fight me if you dare!

Fight by my side, I will never let you down
Fight for your life, till the the end we're standing strong

There is no way out of here
Smell of death is drawing near
Fight me if you dare

Fight by my side, I will never let you down
Fight for your life, till the the end we're standing strong

Fight by my side, I will never let you down
Fight for your life, till the the end we're standing strong
