

Earth, Wind & Fire, Spend The Night

Dawn Thomas

You're like no one else that I have loved before
There's a certain something in my heart
For the first time in my life I know for sure
You're the love that I've been looking for

A few unsettled differences is where we stand
With a little effort we can them out
I just want to hold you in my arms again
Find it in your heart to let me in

Chorus:

I want to spend the night with you
Make love like we used to do
Oh, I want to feel a fire within
I want to fall in love again
After we get through
I want to spend the night with you

There's a full moon shining in the sky above
Let's don't waste this night on sad goodbyes
After all it's you that I've been dreaming of
Let's give into making up

Chorus (repeat)
