

# Echo And The Bunnymen, Lost And Found

I was standing in a graveyard  
under silver studded skies  
in a forest burning ashes  
on the bonfires of our lives  
as the sky fell down  
I was lost and found  
saw my world spin round  
round and round  
All the ghosts have gathered round me  
come to tell me of a change  
in the darkness that surrounds me  
I am falling down again  
on this haunted ground  
I was lost and found  
Chorus  
Lost, lost and found  
Lost, lost and found  
She will tell you her cathedral  
has no windows and no doors  
and you know she doesn't need you  
and that's why you want her more  
As your heart melts down  
you are lost and found  
(repeat chorus 3 times)  
I was counting all the tombstones  
of the buried boys and girls  
as the wind blew in like ice  
and froze this cemetery world  
And we all fell down  
we were lost and found  
and the sun went down  
we were lost and found  
repeat chorus to fade
