

EKKSTACY, i just want to hide my face

Sadness always lasts too long
And I'm just wasting time
How much more can I take of this?
I have felt so gray all my life
(I have felt so gray all my life)
And I just wanna hide my face (just wanna hide my face)
Every day feels the same (every day feels the same)
And when I die, what will they say? (what will they say?)
Will they remember my name? (Will they remember my name?)
And I wish I could forget
That everything will end
And everyone I love has said at least one time
That when we die, everything will be fine (everything will be fine)
And I just wanna hide my face (just wanna hide my face)
Every day feels the same (every day feels the same)
And when I die, what will they say? (what will they say?)
Will they remember my name? (Will they remember my name?)
And I just wanna hide my face
Every day feels the same
And when I die, what will they say?
Will they remember my name?
