

Element Eighty, Scars (The Echo Song)

You said that we would always be friends
You said our love would never end
All you gave to me were scars on my heart
All you did to me was tear my world apart
You left these scars on my heart

You took my love and made it bend
And you knew my money was for you to spend
You stabbed my heart and tore my world apart
and all you left me with were scars on my heart

Scars on my heart
These scars on my heart
Scars on my heart
Scars on my heart

You took my love way past the line
You took this broken heart and you made it mine
But I don't need your sympathy
No I don't need one damn thing

You left these scars on my heart
Scars on my heart
Scars on my heart
Scars on my heart

And now I'm scarred
And now I'm scarred forever

You said that we would always be friends
You said our love would never end
All you gave to me were scars on my heart
And all you did to me was tear my world apart

Scars on my heart
These scars on my heart
Scars on my heart
Scars on my heart

Don't make me

And now I'm scarred
And now I'm scarred
And now I'm scarred forever

Scarred
