Element Eighty, Scars (The Echo Song)

You said that we would always be friends You said our love would never end All you gave to me were scars on my heart All you did to me was tear my world apart You left these scars on my heart

You took my love and made it bend And you knew my money was for you to spend You stabbed my heart and tore my world apart and all you left me with were scars on my heart

Scars on my heart These scars on my heart Scars on my heart Scars on my heart

You took my love way past the line You took this broken heart and you made it mine But I don't need your sympathy No I don't need one damn thing

You left these scars on my heart Scars on my heart Scars on my heart Scars on my heart

And now I'm scarred And now I'm scarred forever

You said that we would always be friends You said our love would never end All you gave to me were scars on my heart And all you did to me was tear my world apart

Scars on my heart These scars on my heart Scars on my heart Scars on my heart

Don't make me

And now I'm scarred And now I'm scarred And now I'm scarred forever

Scarred
