

Ellie Goulding, Here's To Us

You fallin' on your feet
Givin' everything up
There's something in the way
Love is never enough
I see, you sorry
I'm putting down the gun
Don't worry, I don't mind
I've never wanted to be one
I catch you in the light
That no one else can see
I know you see her
And you'll never see me
She makes you feel the most,
Keep your souls alive
But what we had it'll never really die

And this is what I'll say if I had any words
We was mess up, now your heart is reverse
And I know that all truth wasn't here to stay
I gave you all of mine but you gave it away
And now you're the one who hurts
You had to love someone else just to know your worth

But here's to us, here's to us, here's to us
This is just a face
I'm pretty sure that
One day you will ___ never look back
You kept me in the flames but the fire was out
fire was out

And this is what I'll say if I had any words
We was mess up, now your heart is reverse
And I know that all truth wasn't here to stay
I gave you all of mine but you gave it away
And now you're the one who hurts
You had to love someone else just to know your worth
