Elliott Smith, Easy Way Out

You'll take advantage 'til you think you're being used 'Cos without an enemy your anger gets confused I got stuck on a side you know I never chose But it's all about taking the easy way out for you, I suppose There's no escape for you except in someone else Although you've already disappeared within yourself The invisible man who's always changing clothes It's all about taking the easy way out for you, I suppose Well I watch you making mistakes I wish you luck, I really do With the problem, with the puzzle Whatever's left of you I heard you found another audience to bore A creative thinker who imagined you were more A new body for you to push around and pose It's all about taking the easy way out for you, I suppose It's all about taking the easy way out for you, I suppose
