

# Emigrate, My World

Now you get along with me  
I'm gonna make you mine and make you free  
In the new world

Breath goes in and breath goes out  
And it makes me scream, it makes me shout  
In the new world

Rev it up and make it start  
Tear it up and take my heart  
In the new world

I'm lost in you, I'm lost in crowds  
I fight for you, and say out loud  
It's a new world

This is my world (burning, burning)  
This is my world (burning, burning)

Ripped off life and ripped off pain  
I'll take my time and make you sane  
In the new world

This is my world (burning, burning)  
This is my world (burning, burning)

Our whole existence starts to change  
We're born with love and born with rage  
Our whole existence starts to change  
We're born with love and born with rage

Now you get along with me  
I'm gonna make you mine and make you free  
In the new world

Now you get along with me  
I'm gonna make you mine and make you free  
In the new world

This is my world (burning, burning)  
This is my world (burning, burning)

This (burning, burning)  
Is (burning, burning)  
My world (burning, burning)
