## Eminem, For You Only

Ready to embrace the day As we both break, As the light stole in She found me wide awake. Wasted from a sleepless night I reach to touch your hair, Withdraw an empty hand For you're no longer there In between the silence, living is an empty space Save the ticking of the clock As the hands are sweeping past it's face And I just don't wanna be lonely (O no no) Night and day 'Cos as I look around me I just feel that way (Repeat chorus) For you only I turn my hand to something that will clear my head But I cannot forget the parting words we shared I open up my mind to all the pictures I can trace But I cannot recall, the contours of your face And though we slipped away Before I had the chance to say, If I did something wrong Please tell me I'll accept the blame. And I just don't wanna be lonely (O no no) Night and day 'Cos as I look around me I just feel that way (Repeat chorus) For you only For you only
