

EQUINOX, Bones

love is like a black hole
everything is dark
you just gotta let go
and feel it
and feel it
and feel it

we fell off the deep end
just to get a rush
you know that it's right when
you feel it
you feel it
you feel it

what it life
if it's just of the Earth
only of the flesh and bones
wanna thrive in the dust
of the Universe
and way into unknown

so I love beyond the bones
goes deep inside your soul
I love beyond the bones
I love beyond the bones
I love beyond the bones

wanna be the fire
even if it burns
offer up my fibers
to feel it
to feel it
to feel it

what it life
if it's just of the Earth
only of the flesh and bones
wanna thrive in the dust
of the Universe
and way into unknown

so I love beyond the bones
goes deep inside your soul
I love beyond the bones
I love beyond the bones
I love beyond the bones
