EQUINOX, Bones

love is like a black hole everything is dark you just gotta let go and feel it and feel it and feel it

we fell off the deep end just to get a rush you know that it's right when you feel it you feel it you feel it

what it life if it's just of the Earth only of the flesh and bones wanna thrive in the dust of the Universe and way into unknown

so I love beyond the bones goes deep inside your soul I love beyond the bones I love beyond the bones I love beyond the bones

wanna be the fire even if it burns offer up my fibers to feel it to feel it

what it life if it's just of the Earth only of the flesh and bones wanna thrive in the dust of the Universe and way into unknown

so I love beyond the bones goes deep inside your soul I love beyond the bones I love beyond the bones I love beyond the bones
