Faith No More, The World Is Yours

Keep your distance You're in the race (?)

Caress me

In your eye I've got better things to do This will hurt someone White walls, windows Charity(?)
??????defenders(?)

Comfort me and bring me something sharp This will hurt someone - someone else This will hurt someone else Calm down, Think Carefully

Seen it all before

Mind your own fucking business

Seen it all before

What I would give for your eyes

Seen it all before

You'd never blink again

Seen it all before Faces on top of more faces

This bullet in your chest, the world is yours

Each word, you suck it through a straw

It's so predictable, it's policy This will hurt someone - someone else
