Fifth Season, Monday Morning

Feel only broken legs and razor blades No subtleties to stimulate my body is numb I need a strong drink And Ive followed down the hole And Ive followed down the hole

Because we won't be caught in it Yeah we won't be caught in it Yeah, we've made it this far And barely faded at all

Thought about it, the big leap the big cheat Rocks will hold me down until I drown The whole time screaming And Ive followed down the hole And Ive followed down the hole

Because we won't be caught in it Yeah we wont be caught in it Yeah, we've made it this far Barely faded at all

Monday morning well be bugging out

Let's run away and not get found and leave this town No more worries just you and me Well go get lost and stay that way And Ive followed down the hole And Ive followed down the hole Because we wont be caught in it Yeah we won't be caught in it Yeah, we've made it this far And barely faded at all

Because we wont be caught in it Yeah we won't be caught in it Yeah, we've made it this far And barely faded at all
