

# Fiona Apple, Anything We Want

My cheeks were reflecting the longest wavelength  
My fan was folded up and grazin' my forehead  
And I kept touching my neck to guide your eye  
Where I wanted you to kiss when we find some time alone

My scars were reflecting the mist in your headlights  
I looked like a neon zebra shakin' rain off of stripes  
And the rivulets had you riveted to the places that I wanted you to  
Kiss me when we find some time alone

And then we can do anything we want /x3

We started out sippin' the water  
And now we try to swallow the wave  
And we try not to let those bastards get us down

Oh, we don't worry anymore  
Cuz we know when the guff comes we get brave  
After all look around it's happening it's happening  
It's happening now

Let's pretend we're 8 years old playin' hookey  
I'll draw on the wall and you can play UFC rookie  
Then we'll grow up and take our clothes off  
And you remind me that I wanted you to kiss me  
When we find some time alone

And then we can do anything we want /x4
