## Future, No Matter What

Aye we didn't even know it was gonna be like this But we told each other we gonna be there for each other No matter however it goes You know what I'm saying ... like that

We made a bond from the very beginning I found my homie and my best friend I'mma be there for ya 'til the very end No matter what, no matter what, no matter what, yeah We broke the rules, we took it further in We made a promise to each other we gon' never end She gon' be there for the kid, no matter what No matter what, no matter what, yeah

We met through a mutual friend
We started clubbing, dranking, talking, laughing and grinning
You had your eyes on me the whole time
I could see it through my lens
Your face your shape and the lil things about ya...had the kid all in
Anytime we spend time, we spend more than we spend Benjamins
But the fuck this high siddity girl wanna do with an astronaut kid
I'm asking myself questions, I had to understand
You gotta live and learn and make mistakes to be the man
We didn't mean for it to get this serious
I got another nigga bitch with me
And I'm falling for her, yeah I'm falling for her
We ain't got no strings attached
I want her more and more

We made a bond from the very beginning
I found my homie and my best friend
I'mma be there for ya 'til the very end
No matter what, no matter what, no matter what, yeah
We broke the rules, we took it further in
We made a promise to each other we gon' never end
She gon' be there for the kid, no matter what
No matter what, no matter what, yeah

We can talk about whatever, we can fuck wherever It's like we're walking on rose petals, when we together I see you jocking me, and I'm jocking you harder You got everything a woman want, I still want to spoil ya And your loyalty to him ain't my concern 'cause you're loyal It's like we been cast with a spell or both ate some poison Tell him I ain't mean to intervene with his main thing You my main fling, I took it main stream Everyday it's nice to share our main dreams, and ain't a damn thing Will never come between, our thing And we ain't mean for it to be this serious I made a promise to you and I'mma take it serious 'Cause I know my words mean the most to you And you mean the most to me We got a special connection, can't nobody come between

We made a bond from the very beginning I found my homie and my best friend I'mma be there for ya 'til the very end No matter what, no matter what, no matter what, yeah We broke the rules, we took it further in We made a promise to each other we gon' never end She gon' be there for the kid, no matter what No matter what, no matter what, yeah
